PROFILE

Passionate developer with 4 years of experience
doing freelance and part-time jobs while completing my bachelor's
degree. Plus, 2 years of experience working full-time after graduation.
Mainly involved in web and mobile development but
intrigued to learn any new skills and upcoming frameworks. Combined with
minor design and creation skills, contribution in giving the best
user interface and design is a must, though problem-solving is my preference.
Looking forward to exploring a lot more of the software development world.
